

Product Bulletin: C96-925 Modular Torch Body for PT-600

Centricut has introduced a new Modular Torch Body (part # C96-925) for Esab plasma systems using the PT-600 style torch.

This new torch provides users with the option of easily replacing the Insulator Assembly (C47-083) and Insulating Tube Kit (C47-900) resulting in reduced downtime and more cost effective field repairs.

Also included is the Rear Main Body Assembly (C47-066), which features a unique threaded and glued sleeve-to-shell design that improves long term alignment of torch components and overall service life of the torch.

Upgrade to the Modular PT-600 Torch Body and see the benefits of low cost field repairs and improved torch performance.
