Hypertherm announces a major expansion of the Centricut® CO₂ laser consumables product line

Summary: Due to the continued success of Centricut's CO₂ laser product line, Hypertherm is excited to announce several significant enhancements to their current product offering. Customers will now benefit from a much broader product selection for their CO₂ laser needs as described below.

Nozzles, Ceramics & Accessories: This expansion brings three times the number of laser cutting consumable to our already extensive inventory and customers will now enjoy access to consumables for almost any laser cutting system on the market. Any additional products which are not currently offered can be evaluated by our engineering staff for addition to our product offering.

Laser Optics: Hypertherm recently entered into a partnership with II-VI Infrared, the world's leading manufacturer of CO₂ laser optics once again making significant additions to the Centricut product offering. This partnership brings a full line of OEM approved laser optics for customers' laser cutting systems including laser mirrors and the impressive MP5 ultra-low absorption lens.

OEM Brands Covered: Amada, Behrens, Bystronic, Cincinnati, Finn-Power, GHR-SHT, Haas, Haco, Hankwang, Laserdyne, Laser Lab, LVD, Mazak, Messer Greishiem, Mitsubishi, Murata Wiedemann, NTC, Precitec, Prima, Raskin, Rouchaud, Salvagnini, Strippit, Tanaka, Thyssen, Trumpf and Valvivre

These changes to the Centricut CO₂ laser consumables product line, coupled with innovative products such as Armored Sensor Cables, Sensor Cone Refurbishment and outstanding customer, technical and application support, position Hypertherm's Centricut brand as the premiere CO₂ laser consumable supplier in the market.

Launch Date: **October 1, 2009**
